AKSHAT JERATH

UX/UI DESIGNER · MDES DESIGN FUTURES

Mumbai, India · akshatjeratth@gmail.com · linkedin.com/in/akshat-jerath · akshatjerath.github.io/UX-Website/

PROFILE

First-year MDes student at ATLAS SkillTech University. I work research-first: interviews and field audits, then user flows and Figma prototypes. I come to UX from teaching design students, where critique is the core of the job.

PROJECTS 4 SELECTED, ALL 2026

01 — Jun – Oct 2026

SAVVY · Dine-out price comparison app, iOS and Android
SOLO · COURSEWORK CONCEPT · NOT YET USER-TESTED

- Ran 13 diner interviews, 2 surveys and a 10-restaurant audit across 4 dine-out apps in Mumbai
- 8 of 13 interviewees distrusted app coins, so results rank by the cash you pay at the table and coins sit on their own line
- 8 versions in Figma, from audit wireframes to a 17-screen hi-fi critique round and a design system with night and day themes

02 — 2026

Ankur · Smart notebook for early-years teachers in India
SOLO · WORKING PROTOTYPE · ANKURS.ONLINE

- Compared 6 tools against India's NCF-FS curriculum; none of them paired teacher observation with teacher-approved AI
- Human-in-the-loop flow: the AI drafts one small target per child, the teacher approves, edits or skips it, and no child is ever scored
- Built in Lovable with nickname-only records; teacher interviews and a pilot come next

03 — 2026

Greggs 2050 · Brand futures strategy for the UK bakery chain
SOLO

- A 2050 strategy that keeps the core product cheap by structure, paid for by 4 store formats and a membership model
- 60+ AI images, films and sounds held together by one written visual spec, with every output checked and fixed by hand

04 — 2026

The Era of Adaptive Freshness · GROUP PROJECT · SPECULATIVE FOOD FUTURES

- Futures timeline from 1920 to 2045, then 100 ideas each, clustered into 10 themes. Our final scenario: seed companies decide when crops expire

SKILLS

Interface: Figma, wireframing, prototyping, hi-fi UI, visual design, design systems, iOS and Android, motion (Jitter)
Structure: User flows, task flows, information architecture, OOUX, card sorting, MoSCoW
Research: User interviews, surveys, field audits, competitor analysis, research synthesis
AI tools: Human-in-the-loop flows, AI prototyping (Lovable), generative media (Gemini, Ideogram, Flow, Suno)
Tools: FigJam, Miro, Canva, Google Forms, Excel

TEACHING

Volunteer Instructor, Game Design · University of the People, online, part-time · Jun 2026 – now
Faculty · École Intuit Lab, Delhi. Taught Unreal Engine 5 and ran critiques and one-to-one reviews · Feb – May 2026
Faculty · K. R. Mangalam University, Assistant Professor. Taught degree programmes · Dec 2024 – Feb 2026

EDUCATION

MDes, Design Futures · ATLAS SkillTech University, Mumbai · in progress · from 2026
BSc, Computer Game Design · University of Staffordshire · Sep 2020 – Jun 2023

Patents applications, published Sep 2026, not yet granted

Drift-resistant joystick with fabric-based sealing · 202611088580 A
Breathable multi-layer cushioning for head-worn devices · 202611088583 A
Temperature-responsive compression sleeve for pillow firmness · 202611088588 A
